

Deploying HVP Model:

Please follow the instructions below to deploy the **HVP Personality Trait Prediction** model using Docker.

Step 1: Create an EC2 instance

Step 2: Docker image

1. Pull the docker image from docker hub from <https://hub.docker.com/r/jabirai096/hvp> using:
 - a. `docker pull jabirai096/hvp`
2. Run the container:
 - a. `docker -d -p 5000:5000 --name hvp jabirai096/hvp`

Step 3: Use postman or curl to test

1. You can use either postman or curl to test.
 - a. Route: /predict
 - b. Headers:
 - i. Content-Type: application/json
 - c. Body:
 - i. `{"text": "This is the sample test"}`
 - d. Response:
 - i. Json of HVP values
